

# quick pod

*demountable office partitioning system*

Quick Pod is a demountable modular office partitioning system. As an alternative to drywall it offers many benefits including finishes available (Melamine, timber, glazing), furniture classification, and the fact it is reusable.

Services and lighting are integrated into the structure, while air circulation is provided with concealed fans that draw air in from the greater air conditioned open plan office space. The Quick Pod is an excellent solution for offices and meeting rooms in large open plan areas that can be installed without the need for further service integration and with minimal disruption.

## INDEX

- 3 - 5 - Meeting
- 6 - 7 - Office
- 8 - 9 - Clusters
- 10 - 12 - Footprint
- 13 - 14 - Components

When Quick Pod is configured as a meeting room one has a wealth of options when it comes to finishes and layout.  
**MEETING** Timber compliments the Melamine and fabric options.

**CLUSTERS** Quick Pods can be clustered together to achieve different layouts depending on requirements.

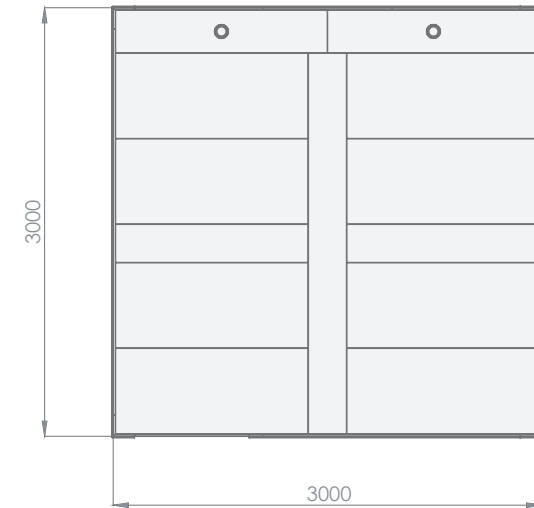

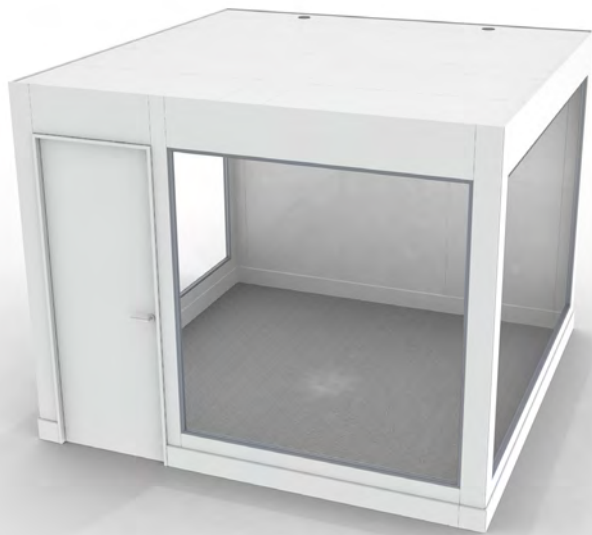

**CLUSTERS** Quick Pods can be clustered together to achieve different layouts depending on requirements.

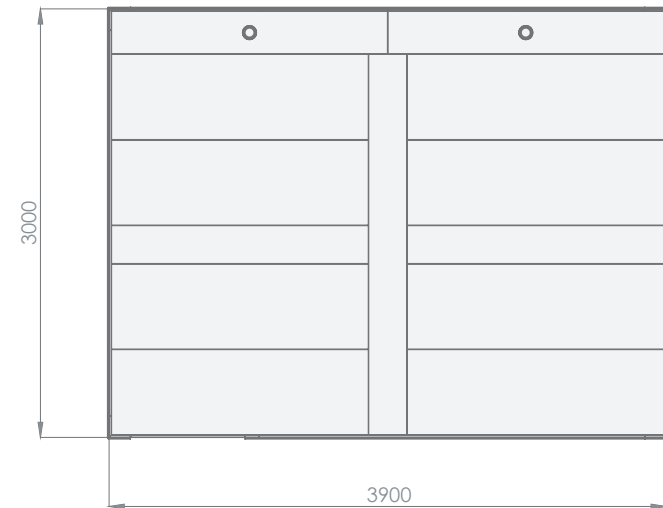

Due to structural and practical considerations three sizes are available, 3m x 3m, 3m x 3.9m, and 3m x 4.8m, all 2.4m finished height. Within these footprints numerous configurations are possible as panels, doors, and glazing assemblies are all interchangeable.

**COMPONENTS** There are relatively few assemblies that make up the component catalogue, affording enough flexibility while keeping the number of components required for redeployment and stockholding to a minimum.

**SOLID WALL PANEL**

**CONNECTOR BATTON**

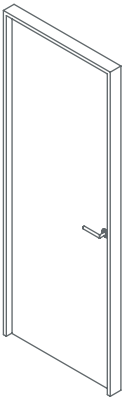

**GLAZING ASSEMBLY**

- 900W  
- 1800W  
- 2700W

**CORNER PANEL**

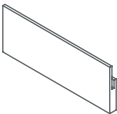

**DOOR FRAME AND DOOR**

- LEFT HAND SIDE  
- RIGHT HAND SIDE

**DOOR SIDE PANEL**

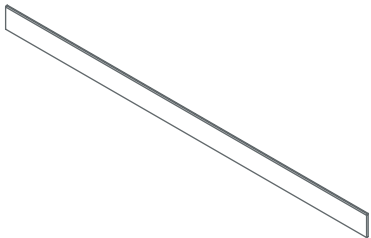

**DOOR TOP PANEL**

**SKIRTING CORNER  
OUTER**

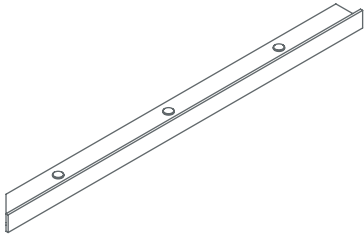

**SKIRTING CORNER  
INNER**

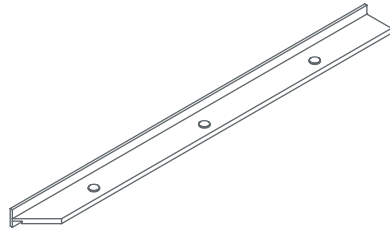

**SKIRTING**

- 900W  
- 1800W  
- 1900W  
- 2700W
